Titania Delivery for eIFU

**Simplify access to and delivery of Electronic Instructions for Use (eIFU) anywhere on any device**

Quickly access the most accurate electronic Instructions for Use (IFU) optimized for viewing on any device

Medical technology providers are mandated to deliver accurate Instructions for Use (IFU) for all products and accessories. IFUs are used to inform healthcare professionals, patients, regulatory organizations, and the public of the product's purpose, proper use and safety guidelines. For globally distributed products IFUs must also be provided in local language for all regionally available products.

Titania Delivery for eIFU eliminates the tedious, time-consuming and costly manual processes often needed to post eIFUs. Without dependence on third-party servcies, you can now make all approved eIFU content readily available on a portal that can be accessed from any computer or smart device.

Titania Delivery enables users to:

- Search for and navigate to relevant eIFUs and related material
- Access country and language specific versions of eIFUs
- Assign a language preference for their user interface
- View current and previous versions of eIFUs
- Easily request print versions or technical support from the manufacturer

Titania Delivery enables your organization to:

- Provide a single secure location for healthcare professionals, patients, regulatory organizations and the public to access your eIFU content
- Automatically upload approved, accurate and up-to-date eIFUs to your web portal as soon as they are available (or manually upload if needed.)
- Brand and configure your portal or multipel portals to create the desired user experience
- Synchronize your print and online versions
- Improve your content through direct feedback provided by your users
- Integrate web portal with eIFU source repository and other business systems
- Control access for authorized adminstrators to manage eIFU content and user access
- Reduce the cost of publishing, storing and distributing information
- Reduce IT costs and effort using a hosted, scalable solution
- Meet regulatory requirements by providing all required access to eIFUs

Titania software

Titania Delivery includes the following key components:

- Content Delivery Repository
- Online Delivery
- Feedback and Comments
- Adminstrative Interface

Content Delivery Repository

Provide a content portal of approved eIFUs and related content for easy access 24/7.

- Secure and scalable hosted solution
- Advanced search capabilities, including metadata and full text searching
- User management of roles, privileges and access permissions
- Content uploads and downloads
- Project creation for managing delivered content
- Organization creation for managing project collections
- Administration of projects and organization

Online Delivery

Publish eIFUs on-demand to the output media of choice.

- Publishing individualeIFUs or collections of IFUs
- Define search facets and visible eIFU document details
- Defining publishing variables, such as logos, branding elements, etc.
- Selecting from available stylesheets
- Administration capabilities:
  - Identify available eIFU for publishing
  - Upload and associate stylesheets with document types and output formats
  - Define automatic and on-demand transformations

Make it easy to locate the exact IFU with guided search based on eIFU metadata. All search facets are configurable.

Feedback Capture and Reporting

Improve planning, quality, and customer satisfaction with built-in feedback and commenting

- Allowing users to comment and provide feedback on content
- Generating reports of all feedback on individual eIFUs
- Report on eIFUs accessed, browser and media used to access and more

Administration Interface

Manage your content delivery portal settings, users, content and automations with a user-friendly interface. With the administration interface, you can:

- Create project and organization collections for uploaded content
- Manage user roles, permissions and access controls
- Configure content synchronization options and settings
- Upload and manage publishing stylesheets
- Generate and access feedback reports

Titania Software provides solutions focused on intelligent content delivery and user enabled dynamic publishing. Our solutions help optimize the consumers' content experience and increase your organization's opportunities to increase efficiencies and lower costs.

Titania Software solutions encompass:

- Dynamic assembly
- Interactive documents
- Faceted search
- Feedback & comment management
- Analytics
- Synchronization across systems
- Multi-media publishing
