

Benefits

- Out-of-the-box DITA support
- DITA Open Toolkit integration for publishing
- Comprehensive authoring tool integrations
- Simultaneous and automated multichannel delivery
- Powerful version and content variation support
- Multilingual content management

We built SDL Knowledge Center on an embedded component content management system (CCMS), with which you can store, organize and manage modular content.

The structured content foundation allows you to easily reuse, share, filter and deliver multilingual content to any channel. SDL Knowledge Center also provides DITA support out of the box, so you can avoid inconsistencies that would otherwise impact your brand and reduce content development costs by up to 50%.

Structured content features

Advanced versioning:

Baseline Manager is a visualization tool that tracks the release of product information to market. With it, your information developers can:

- Sort content by status
- View updated versions of topics
- View maps and graphics
- Compare versions
- Update and share information

XML authoring tool:

SDL Knowledge Center has tight integrations with JustSystems XMetal, PTC Arbortext and oXygen. In addition, you can synchronize content quality capabilities with Acrolinx across desktop and server-based content creation.

Automated publishing:

Publication Manager lets you publish content across channels simultaneously. Lead information developers can oversee the relationships between all of the components that go into any final deliverable in its advanced dashboard.

Support for content variations:

In addition to the standard conditions set out in the DITA standard, Condition Manager enables information developers to combine any number of conditions so they don't have to manage all iterations.

SDL*

SDL (LSE:SDL) is the global innovator in language translation technology, services and content management. With more than 20 years of experience, SDL delivers transformative business results by enabling powerfully nuanced digital experiences with customers around the world.
