

Titania eIFU Delivery

Simplify management, access to and delivery of Electronic Instructions for Use (eIFU) anywhere on any device

Quickly access electronic Instructions for Use (IFU) optimized for viewing on any device

Medical technology providers are mandated to deliver accurate Instructions for Use (IFU) for all products and accessories. IFUs are used to inform healthcare professionals, patients, regulatory organizations, and the public of the product's purpose, proper use and safety guidelines. For globally distributed products IFUs must also be provided in local language for all regionally available products.

In our growing digital world where patient safety and sustainability are driving global health authorities to allow, and in some cases require, electronic Instructions for Use (eIFU), many leading medical technology companies are leveraging eIFU solutions. In addition to being regulatory compliant, these organizations are enabling their customers to more quickly and easily locate and access IFUs online, while also benefiting from improved operational costs and efficiency.

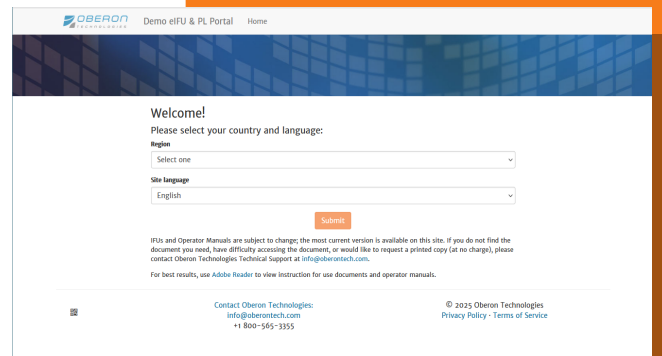

Titania eIFU Delivery eliminates the tedious, time-consuming and costly manual processes often needed to post eIFUs. Without dependence on third-party services, you can now make all approved eIFU content readily available on your custom branded portal(s) that can be accessed from any computer or smart device.

Titania eIFU Delivery enables users to:

- Search for and locate desired eIFUs and related material
- Access country and language specific versions of eIFUs
- Assign a language preference for their user interface
- View current and previous versions of eIFUs
- Easily request print versions or technical support from the manufacturer

Titania eIFU Delivery enables your organization to:

- Rapidly deploy a regulatory compliant eIFU solution
- Easily manage eIFUs and related metadata
- Provide a single secure location for healthcare professionals, patients, regulatory organizations and the public to access your eIFU content
- Automatically upload approved eIFUs to your web portal as soon as they are released
- Brand and configure your portal or multiple portals to create the desired user experience
- Synchronize your print and online versions
- Improve your content through direct feedback provided by your users
- Integrate your web portal with your IFU approval system and other business systems
- Control access for authorized administrators to manage eIFU content, metadata, and user access
- Reduce the cost of publishing, storing and distributing information
- Reduce IT costs and effort using a hosted, scalable solution
- Meet regulatory requirements by providing all required access to eIFUs

Titania eIFU Delivery application includes the following key components:

- Content Delivery Platform
- Online Delivery Portal
- Feedback and Reporting
- Administrative Interface

Content Delivery Platform

Establish a scalable foundation for delivery of approved eIFUs and related content 24/7.

- Secure and scalable hosted solution
- Advanced search capabilities, including metadata and full text searching
- Provide global access, localized UIs and content
- Track content use and feedback in Analytics Reports
- Ensure 24/7 access with redundant systems
- Ease integration with other enterprise applications

Online Delivery Application

Access eIFUs on-demand with any browser on any device anywhere in the world.

- Post the latest eIFUs and associate with older versions
- Display search facets and key metadata for quick eIFU access
- Use company/brand specific styling for eIFU portal

Feedback Capture and Reporting

Improve planning, quality, and customer satisfaction with built-in feedback comments and analytics reporting.

- Allow users to comment and provide feedback on content
- Generate reports of all feedback on individual eIFUs
- Report on eIFUs accessed, search terms, location, browser and media used to access and more

Administration Module

Manage your content delivery portal settings, users, content and automations with a user-friendly interface.

With the administration module, you can:

- Create project and organization collections for uploaded content
- Manage user roles, permissions and access controls
- Manage eIFU metadata
- Configure content synchronization options and settings
- View and download analytics reports
- Track history of content uploads and interface changes

Make it easy to locate the exact IFU with guided search based on eIFU metadata. All search facets are configurable.

The screenshot shows the 'Demo eIFU & PL Portal' search page. It features a 'Search By...' section with five search criteria: Search term, Product line, Product brand, Product category, and Document number. Each criterion has a corresponding search input field with a magnifying glass icon. Below the search fields, there is a small disclaimer: 'IFUs and Operator Manuals are subject to change; the most current version is available on this site. If you do not find the document you need, have difficulty accessing the document, or would like to request a printed copy (at no charge), please contact Oberon Technologies Technical Support at info@oberontech.com. For best results, use Adobe Reader to view instruction for use documents and operator manuals.' At the bottom right, there is a 'Change country and language' link. The footer contains contact information for Oberon Technologies: 'Contact Oberon Technologies: info@oberontech.com +1 800-565-3355' and '© 2019 Oberon Technologies Privacy Policy Terms of Service'.

About Us

Oberon Technologies' focus is on providing intelligent and interactive delivery solutions that make it easy to find, personalize and interact with content from any device. Our software solutions are designed to deploy rapidly and scale easily with no burden on web or IT teams. Our goal is to help you streamline content delivery to meet the needs of your team, your company, and your global information consumers - creating significant opportunities to reduce operational costs and increase revenue.
